

01 Domain Names & URLs

- The BusinessGT system is hosted on our own clusters of servers – and we own our own DNS servers (alpha.sqlisp.net and beta.sqlisp.net) so it is possible for you to use our web services and the whole system, whilst not using our email service.
- All new trialists are set up with a system which is hosted on the BusinessGT domain master of their choice (either .co.uk, .net or similar), and on the Domain name of BusinessGT. Each system has its own unique SUB-DOMAIN so the full address will like this: YourDomain.businessgt.co.uk
- It is easy to switch to having your own URL address if you wish.
 1. If you want us to buy the domain URL on your behalf, we are quite prepared to do this. For “.co.uk” URLs the charge is 5 credits a month, for “.com” the charge is 10 credits a month – both with a minimum one year. If you choose to leave BGT, we will release the URL reference to you - with 3 months notice.
 2. If you already have a web site, it is not possible to integrate this with the BusinessGT web site – because the BGT service is wholly integrated (web site, CRM, suppliers, target customers, accounting and projects).
 3. If you already have an email provider, you could continue to use them, whilst moving your web site to BGT.
 4. If you already own your own domain URL (unique reference locator) you could put the ip address of our servers, into your DNS server details.
- In either of these options, buy the number of credits you need from the BGT shop (you always need to keep a minimum of 2 months credit in your system). Go to the BGT shop and you can then add the URL type that you need to your account. We will contact you within 24 hours and discuss what you want, and how and when you want it to be done.
- We do not allow the BusinessGT system to be hosted on 3rd party servers.
